

GROUND SCREW ADVANTAGES – ADDED VALUE

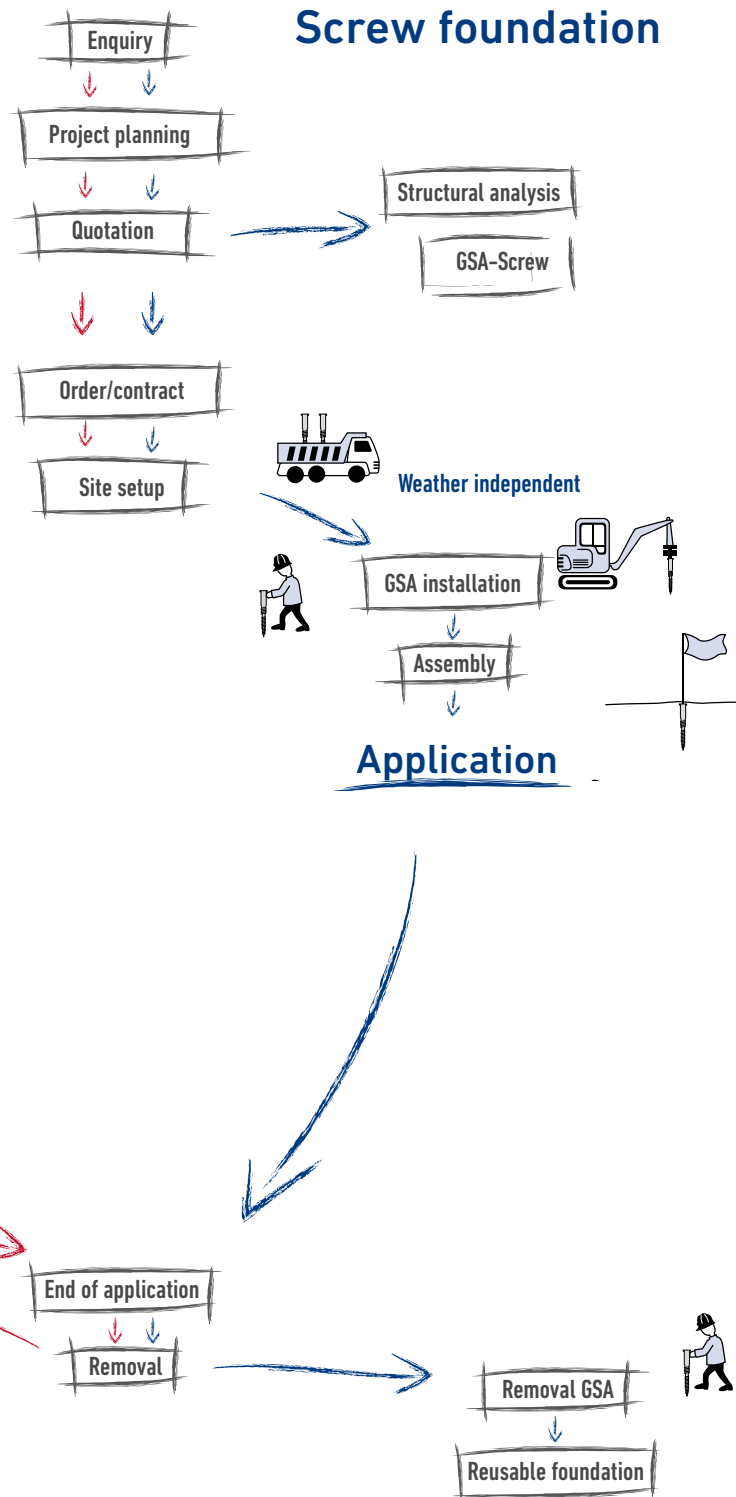

faster · more efficient · safer & environment friendly

The innovative foundation method of 5l GHF 5@5B Ground Screws simplifies planning and implementation for safer, quicker and more affordable building. It requires no earthworks or concrete pouring, and hence none of the transport costs or logistical effort that comes along with it. No construction site disruptions during installation. The soil structure and vegetation remain largely untouched. Also the surface remains unsealed, and foundations can be removed fast and easy if required.
